Michele,

I confirmed with the project lead that there is no acid being used.

Thanks,

Sonnie T. Pineda

I saw that too and I was trying to contact the project lead to verify. I will send you an email once I get clarification.

Hi Sonnie,

Thank you for sending a readable copy. It seems there is no acid being used; the title said "acidizing", so it was a bit confusing. We have no objection to this project. Please include a summary in the next quarterly report as you have done previously.

Sincerely,

Michele Dermer

Hi Sonnie,

Any time something is injected into the well we should be notified, and will need to review your plans. We can do this quickly so it will not cause you difficulty. Please note the attached plan is a corrupted file so please re-submit a clean uncorrupted file. Thanks,

Michele

Importance: High

Michelle,

How are you? I wanted to ask about the protocol on performing maintenance on the Well. One of our well cave-in and we are planning on cleaning it (removing the fill dirt). The job will be performing a Matrix Acidizing with CT Treatment, see attached proposal.

Is there an EPA approval requirement that we need to submit to clean our Well?

Awhile back, when our well cave-in, I will call George Robin and will enter the maintenance information performed on the quarterly report.

Approval of Well cleaning by the EPA prior to performing the job may cause hardship on our energy MW production business if we have to seek approval every time the Well cave-in.

Let me know.

Thanks,

Sonnie T. Pineda
